Software Engineer

TypeScript • React • React Native • Node.js • PostgreSQL • AWS

Experience

Fanaye Technologies

Fulltime

Full-Stack Engineer | QA & Project Coordination

Sept 2025 - Jan 2026

- Led test case design, regression testing, API validation, and production bug analysis across web and mobile releases, improving release stability and reducing post-deployment issues.

ISP Marketplace (India)

- Built the web and mobile applications using React, React Native, and Tailwind for a multi-tenant ISP marketplace with User, ISP Admin, and Super Admin dashboards, while also contributing to the NestJS backend and API implementation.
- Collaborated across frontend and backend to integrate REST APIs with NestJS and PostgreSQL, implementing and debugging data flows across user and administrative workflows.

Spare-Parts ERP (China, 10M+ records)

- Took ownership of a large-scale React + Laravel ERP, stabilizing existing foundations and completing core business workflows.
- Optimized workflows operating over 10M+ records through SQL tuning, efficient data loading, frontend virtualization, and caching, reducing 10+ second timeouts to millisecond-level responses while preserving the user experience.

AfriLearn International

Fulltime

Software Engineer

July 2025 - Sept 2025

- Built an AI-powered visa interview platform with real-time voice conversation using low-latency STT → LLM → TTS streaming, WebSockets, audio buffering, and custom BERT-based Voice Activity Detection with ONNX.
- Deployed and maintained production web and AI infrastructure on AWS EC2, implementing reliable streaming workflows and reducing reliance on third-party hosting services.
- Rebuilt the public website end-to-end, improving Lighthouse performance from ~60 to 100 across SEO, UX, and performance, contributing to 600+ new users in one month.

Self Employed

Remote

Fullstack Developer (Freelance)

Apr 2025 – June 2025

- Built and shipped production Next.js and TypeScript applications with authentication, role-based admin dashboards, and client-specific workflows.

Adot Technologies

Remote

Co-Founder / Frontend Developer

Aug 2024 – Mar 2025

- Designed and built Adot ERP and company website using Next.js, TypeScript, Shadcn/UI.
- Built a reusable, component-driven UI system to accelerate development across multiple dashboards.

WTB Import and IT Solution

Remote

Frontend Developer

Dec 2023 - July 2024

- Built React and Redux dashboards integrated with REST and GraphQL APIs, focusing on performance, reliable data flows, and responsive user interfaces.

Faith Import & Trade

Contract / Hybrid

Fullstack Developer

Aug 2023 – Nov 2023

- Delivered a Next.js + PostgreSQL internal task management system with secure authentication and PWA capabilities.

To whom it may concern

It is a true pleasure for me to write this letter of recommendation for Mr. Bereket Kinfe, who was my student in Software Engineering in college of computing science at Debre Berhan University, Ethiopia. He is a careful and creative thinker person with devotion of logic with science and outside them. He has terrific ability to draw on his own experience and observation to develop thoughtful opinion on different variety of issue.

Bereket already knew he wanted to major in software development when he took my course but this didn't diminish his intellectual curiosity about the topic we covered in the Software Engineering. His regular contribution to full class discussion provided insight both for his peer and for me as an instructor. He also invaluable in small group interaction with his classmate.

His strong dedication and depth of knowledge in the course field of study proves that he is strong in his technical fundamentals. He has an inquisitive mind and good interpretation abilities that will greatly facilitate professional work at workplace and further study. Without asking somebody, he took on the responsibility of helping his classmate consolidate vast amount of information in to coherent set of idea. In addition he was very generous with his time and energy.

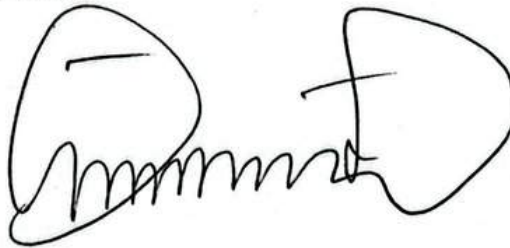

Bereket is not only an excellent student but he is also personally delightful. He is as comfortable as himself as he is engaging, pleasant, and humorous. As I got to know Bereket over the semester I became only more impressed by the wide range of his abilities and his modesty about them. He is an accomplished his Software Engineering study with passion rare in undergraduate.

I wholeheartedly recommended Bereket as prospective software Engineering student. In fact I can think of few student whom I would recommend as highly. He will add a great deal to any incoming Software Engineering field of study. I can also envision Bereket as a highly competent and caring Software Engineer someday, which I say as a high compliment indeed. Please contact me if there is anything else I can do on his behalf.

With Regards!

To whom it may concern

I am writing to confirm that **Bereket Kinfe** worked with **Faith Import and Trade** as a Web Developer on a contractual basis from **August 2023** to **November 2023**. During this period, Bereket was responsible for the following;

- Designing and developing a fully functional website for our company.
- Building an internal task management web application
- Creating and designing the company's branding materials, including logo, seal, and slogan.
- Managing social media branding and assets.
- Maintaining the website and web app post-launch.
- Implementing SEO strategies to improve search engine visibility.

Bereket was compensated **ETB 45,000** for the successful completion of the project and for meeting our expectations.

Throughout the engagement, Bereket demonstrated a high level of professionalism, creativity, and technical skill. His work exceeded our expectations, and he collaborated effectively with our team to ensure the project was delivered smoothly and on time.

We were particularly impressed with his ability to adapt to our evolving needs and deliver a high-quality digital presence that aligned with our brand vision. It was a pleasure working with Bereket, and we highly recommend him for future opportunities.

Should you require any further information, please feel free to contact us.

Sincerely,

Ermias Tesfaye

General Manager

To Whom It May Concern

I am pleased to write this letter of recommendation for Bereket Kifle, who has been an outstanding intern at DAFtech Social ICT Solution Plc. He has made a significant and positive impact during his time with us.

As an intern, Bereket played a crucial role in developing our customer support system and building websites for our company. His professionalism, enthusiasm, and dedication were exceptional. He quickly grasped the intricacies of the projects and collaborated seamlessly with the team. The websites he developed exceeded our expectations, and the support system he created has been instrumental in assisting our customers.

Bereket's attention to detail ensured that the websites he built were visually appealing, user-friendly, and fully functional. He followed best practices and incorporated industry standards, optimizing the websites for peak performance and implementing stringent security measures. He consistently met deadlines and went above and beyond to deliver high-quality work.

I have full confidence in Bereket abilities and believe that he possesses the necessary skills for success in your company. If you require any further information or have any questions, please feel free to contact me.

Sincerely,
